

Dr. Brian Argrow

Project Investigator – University of
Colorado at Boulder
Aerospace Engineering Sciences

Professor Argrow is Associate Dean for Education, the Alfred and Betty Look Professor of Aerospace Engineering Sciences, and cofounder and director of the Research and Engineering Center for Unmanned Vehicles at the University of Colorado at Boulder.

His research interests include unmanned aircraft systems design, airborne remote and in-situ sensing systems, and aerodynamics.

He has worked in these areas for 20 years with 60 peer-reviewed publications.

He has received funding from AFOSR, DARPA, FAA, NASA, NSF, and industry.

He is currently the director of the Research and Engineering Center for Unmanned Vehicles, chair of the AIAA Unmanned Systems Program Committee, and co-chair of the FAA Research Advisory Group.
